

Newsletter N°3

National pilots, to be continued!

All through the Winter and Spring of 2022, the Vetreality partners organized their national pilot sessions for our second intellectual output, the training programme for VET teachers. Let's see how it worked out in Italy...

In Florence, home to our project's leaders, the training was held from 9 to 15 June 2022 on CO&SO's premises, and facilitated by the two VET trainers who attended the European training programme in Graz, Austria (November 2021).

The participants, who were 10 social workers working for CO&SO's associated cooperatives, found the training very useful. They had the opportunity to discuss the pros and cons on the use of VR for teaching, and

the potentialities it might have when working with SEN students. For some of them, it was the first time they used both VR hardware and softwares and they thought it was a strange experience... You definitely need to get used to it! Overall, the Training Programme was greatly appreciated by all participants.

Similarly, the Irish pilot session was held in late April by Cork Education and Training Board:

In Campobasso, Reattiva organized their pilot session at the end of May:

Mobility Toolbox

The project's third and last output, the Vetreality Mobility Toolbox, giving VET teachers useful tips to encourage their students to take part in a mobility experience, is now finalized. It is being translated into 6 languages and will soon be freely downloadable on our website. The toolbox will come along with a VR application to be used by VET teachers and their students.

Next steps

As our project is drawing to a close, all the partners will meet in Campobasso, Italy, on November 14-15 for the last transnational meeting, which will be followed by the final conference. Besides, multiplier Events will be held in partner countries to disseminate the project results and outcomes
